

## NATIONAL MARITIME SAFETY AUTHORITY

### CAREER OPPORTUNITY

The National Maritime Safety Authority (NMSA) is responsible for promoting, complying with and maintaining world class maritime safety standards in Papua New Guinea consistent with legislation and commitments under National Legislation and International Conventions in order to facilitate a safe, efficient and environmentally responsible shipping sector for stakeholders in government, industry and the community. Under the mandate, NMSA ensures a fully functioning and effective network of aids to navigation; availability of high quality and up to date navigational charts; that vessels meet the safety standards required by law and international commitments; ensuring seafarers' competency through vigilant examination and certification, and coordinating maritime responses to distress calls and monitoring and controlling ship-sourced pollution. The NMSA now wishes to fill the following positions:

#### Manager Maritime Information Management System

##### **Job Objective**

To align and harmonise harvesting and utilization of data and information with the aim of developing an avenue where data and voice collected goes through a complete lifecycle. Take responsibility for the effective and efficient management of maritime information system and oversee the collation, analysis, dissemination and storage and retrieval of maritime data and information.

##### **Principal Accountabilities and Services Standards**

Among the core accountabilities the successful incumbent will:

*Ensure Department and NMSA is kept abreast of the status of data and information relating to shipping, environment, safety, security and the maritime industry taking into account cross-cutting issues such as climate change, sea level rise and cater for other emerging ocean use activities; develop and maintain an array of existing and new technological infrastructures, platforms and sensors in accordance with international best practices and standards; collate, analyse, disseminate and store and retrieve maritime data, voice and information crucial for supporting all core functional responsibilities within NMSA such as coordinating emergencies, adding value to strategic management decisions leading to the development of policies, regulations and forecasts; assess, manage and mitigate maritime risks pertaining to key operational sectors of NMSA.*

##### **Person Specification and Experiences**

The successful person for this position must meet the following requirements:

##### Skills

Excellent leadership skills; advance communication skills; excellent report writing and presentation skills; ability to mentor and manage.

##### Knowledge

Demonstrated and sound knowledge and understanding of national and international maritime legislations and practices; thorough knowledge of Flag, Coastal and Port State responsibilities and obligations and obligations; National Maritime Legislations; International Maritime Conventions and rules.

##### Qualifications

Minimum qualification is Degree in Applied Science, Information Communications Technology and/or Master/Engineer Class 1.

##### Experience

Minimum of 10 years working in the maritime and shipping industry would be advantageous.
